

```
/* Program to Count Total Number of Objects Created for Class */

import java.io.*;

class abc
{
    static int count;
    abc()
    {
        count++;
        System.out.println("objects"+count);
    }
}

class mn
{
    public static void main(String s[])
    {
        abc a1 = new abc();
        abc a2 = new abc();
    }
}
```

**Output:**

```
C:\jdk1.1.3\bin>javac mn.java
C:\jdk1.1.3\bin>java mn
objects1
objects2
```
