

```
/* Program to Count Total Number of Objects Created for Class */  
  
import java.io.*;  
  
class abc  
{  
    static int count;  
    abc()  
    {  
        count++;  
        System.out.println("objects"+count);  
    }  
}  
class mn  
{  
    public static void main(String s[])  
    {  
        abc a1 = new abc();  
        abc a2 = new abc();  
    }  
}
```

**Output:**

```
C:\jdk1.1.3\bin>javac mn.java  
C:\jdk1.1.3\bin>java mn  
objects1  
objects2
```
