

```
/** Program to Illustrate the use of Methods of Vector Class */  
  
import java.util.*;  
  
class vctr  
{  
    public static void main(String arg[])  
    {  
        Vector list = new Vector();  
        int l = arg.length;  
  
        for(int i=0; i<l; i++)  
        {  
            list.addElement(arg[i]);  
        }  
        list.insertElementAt("COBOL",2);  
        int size = list.size();  
        String lary[ ] = new String[size];  
        list.copyInto(lary);  
        System.out.println("List of Languages");  
  
        for(int i=0; i<size; i++)  
        {  
            System.out.println(lary[i]);  
        }  
    }  
}
```

Output:

```
C:\WINDOWS\system32\cmd.exe  
D:\prac>java vctr java c c++ ahp  
List of Languages  
java  
c  
COBOL  
c++  
ahp
```
