

```
# Shell Program to Implement If Statement

clear

echo "Enter any number: "
read n

if [ $n -le 10 ]
then
    echo "Number is less than or equal to 10."
else
    echo "Number is greater than 10."
```

**Output:**

A terminal window titled "root@localhost:~/Programs" with a menu bar (File, Edit, View, Terminal, Tabs, Help). The terminal output shows the script being executed: "Enter any number:", the user input "5", and the output "Number is less than or equal to 10." followed by the shell prompt "[root@localhost Programs]#".

```
root@localhost:~/Programs
File Edit View Terminal Tabs Help
Enter any number:
5
Number is less than or equal to 10.
[root@localhost Programs]#
```
